Summary

Motivated Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, gained through coursework and hands-on project work. Skilled in C/C++, Python, HTML, and SQL, with practical experience mentoring peers on coding and problem-solving as part of Smart Interviews. Certified in Google Study Jam AI programs and Cyber Security (Edi Globe, in collaboration with IIT-KGP). Seeking to apply strong problem-solving, debugging, and web development skills to an entry-level Software Engineering or Data Structures/Algorithms-focused role.

Education

Lakshmi Narain College of Technology and Science, Bhopal

Bachelor of Technology -CSE (Ongoing), Current CGPA :8.05

Bhopal, India

Aug, 2024 -Aug, 2028

Gurukul School, Maheshwar Road, Dhamnod

Higher Secondary Education (12th), Percentage:79.6

Dhar, India

May, 2023 -May, 2024

Gurukul School, Maheshwar Road, Dhamnod

Secondary Education (10th), Percentage:76.8

Dhar, India

May, 2021 -May, 2022

Skills

Languages: Hindi, English

Core Languages: C, C++, Python, MySQL

Soft Skills: Teamwork, Communication, Problem Solving, Time Management, Critical Thinking, Leadership

Tech Skills: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS) , GitHub, VS Code, Basic Linux, MS Word, MS Excel

Certifications

- Cisco Junior Cybersecurity Analyst Career Path certificate
- Ediglobe Cyber Security Course Completion Certificate
- Ediglobe Internship Completion Certificate
- Ediglobe Project Completion Certificate
- Google Study Jam Program Completion Certificate
- MANIT DSA Workshop Certificate
- MANIT Web Development Workshop Certificate
- Outskill Generative Ai Certificate
- JavaScript Case Study Certificate

Projects

❖ Library Management System

- I built a Command-Line Interface (CLI) Library Management System using Python for the application logic and MySQL for persistent relational data storage. The goal of this project is to automate traditional library ledger books by tracking inventory, monitoring member checkouts, and calculating real-time availability dynamically without risking data loss when the app closes.

❖ Hospital Management System

- I built a Command-Line Interface (CLI) Hospital Management System using Python for the application logic and MySQL for persistent relational data storage. The core objective of this project is to digitize hospital operations—specifically automating patient records, doctor allocations, and appointment tracking to streamline hospital workflows and replace manual paperwork.

❖ RC Car

- In Class 12, I engineered a wireless, transmission-controlled RC Car designed as a functional working model of the Pragyan Rover from India's Chandrayaan-3 lunar mission. The primary objective of the project was to demonstrate remote exploration and locomotion mechanics over rough terrain using simple, cost-effective RF transmission modules.

Extracurricular

- Participated in Smart India Hackathon (SIH) 2025.
- Participated and Completed in Google Study Jam Program 2025.
